

Robot Glass Cleaner-W110S

Mamibot

Window is the first defence of our home

Dust
Will cause some respiratory disease

Bacteria
Will harm health by a lot of pathogen

Heavy Metal
Will raise children's blood lead and then injure it

Dusky
Will depress people dusky seeing outside world

Don't Risk Your Life

Cleaning window glass by hand will need many tools and time. There is no easy way to clean window glass especially when you live in tall apartment building. Also will take big risk to clean external windows. If you hire someone to clean for you, will cause a high cost.

3 Simple Steps to start Powerful Cleaning Job

- 1 Power-on**
(Make sure the backup power is full before it start to work)
- 2 Tie up the safety rope**
Place Robot on the glass, press power switch. (Let go before you make sure it adsorb window glass)
- 3 Press "Start"**
ROBOT will start automatic cleaning. (Also you can use remote control or APP on your cell phone.)

Two-sucker vacuum absorption
Compactly absorbed, Enduring Security

Vertical Gravity > 26KG **Horizontal Force > 13KG**

Multiple Security Assurance

1. Overcome limitation of thickness
Two-sucker vacuum absorption
2. Overcome limitation of distance
You can equip more extra extension wire, so that it can clean wherever it can get.
3. A extension wire as 4 meter long

Algorithm for Smart Cleaning

Microcomputer Control
Comprehensive cleaning, automatically complete, worry-free cleaning.

3 different routes to clean

Multiple Surface Application

Safe and Reliable
safety rope + safety lock

Safety weight up to 30 KG

Inbuilt UPS System for Safety while using on high heights

Power-off Protection
UPS emergency protect power for 30 minutes. Which means it can keep absorb for 30 minute even if power off.

Multiple Control System

Mobile APP control | One key touch-on | 2.4G remote control

Washable Cleaning Pads

Strong adsorption and super absorbent cleaning cloth can clean oil stand, dirt and dust, etc.

Natural fiber fabrics
Can be repeated used more than **180** times.

Working Principle

Cleaning cloth can touch border directly
Cleaning cloth twist won't damage the glass

Suction air Suction air

Negative pressure zone suck in air and take a lot dust and bacteria. And these won't accumulate on the cleaning cloth
