

# ROBOT GLASS CLEANER-W120

# Mamibot

**AI Cleaning Technology**

Faster rotating speed, stronger suction power, better cleaning

More labor saving  
Less strain to lumbar muscle  
Easier cleaning experience

**Super Slim Design**

8.5cm

Easy to clean corners with limited access or anti-theft windows with limited cleaning space

**Floating Cleaning Pad**

The robot suits itself well when cleans uneven surfaces

**Cleans quietly**

You can't even notice it while you read, watch TV, chat or have a drink

65dB

**Strong Vacuum Suction to Surfaces**

Higher vacuuming power protects it from falling

Detects pressure change intelligently  
Fills up suction pressure automatically

**5600Pa**  
Vacuum suction

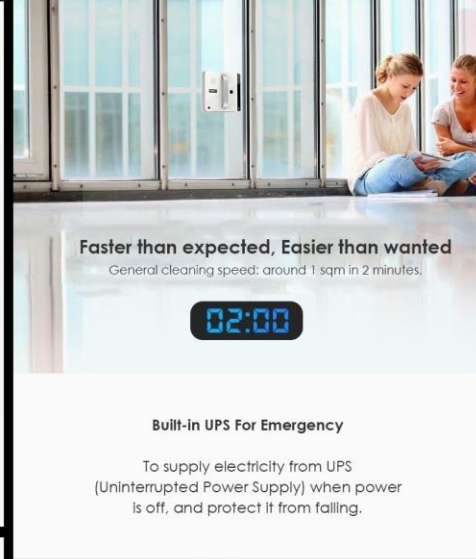

**Faster than expected, Easier than wanted**

General cleaning speed: around 1 sqm in 2 minutes.

02:00

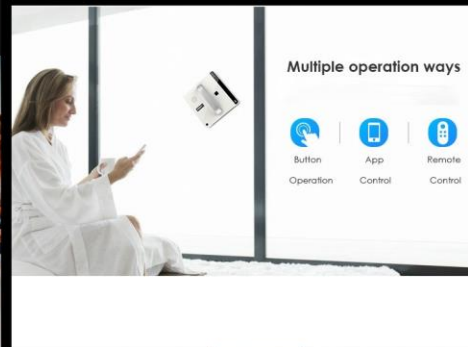

**Built-in UPS For Emergency**

To supply electricity from UPS (Uninterrupted Power Supply) when power is off, and protect it from falling.

**Multiple operation ways**

Button Operation App Control Remote Control

**Microfiber Cloth**

Cleans with more care and higher efficiency

**Yellow Cloth** has bigger friction and is suitable for dry cleaning

**Blue Cloth** has smaller friction and is suitable for wet cleaning

**Brushless Motors**

Higher rotating speed  
More continuous output  
Longer lifespan  
Better cleaning ability  
Lower noise level

**20min**  
UPS working time

**Simple but intelligent**

Press to start cleaning in smart routes

**Remote control** from farther distance & multiple directions

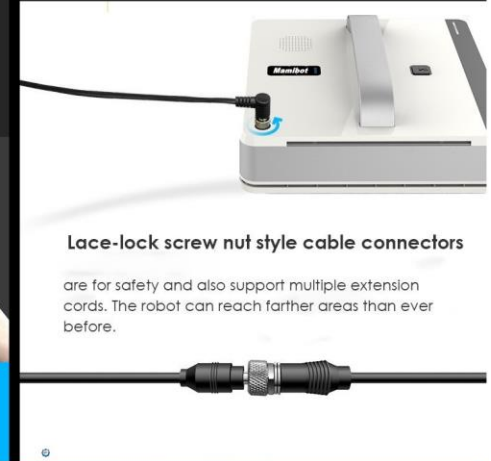

**2.4G 15m**  
Stronger signal Farther distance

Control it through APP

**Lace-lock screw nut style cable connectors**

are for safety and also support multiple extension cords. The robot can reach farther areas than ever before.
