

## about us

We are the 1st Indian Enterprise which got Awarded as "Technology Lead Business Transformation Leaders of India" for 2018 by CSI for successful implementing Robots in Domestic Market. We entered in the market with DYI & Hardware sector in 2011, over the passage of time we diversified and started Domestic & Commercial Robotic Automation division. We launched India's 1st Robot Grass Cutter and Swimming Pool Cleaner in 2014 and we are still maintaining the tag of being only & 1st Indian organization to sell Robots in Facility Management Domain.

World is moving towards the era of digitization where everyone wishes to do the things smartly. Property maintaining Sector is also ramped up to Intl. Stds. where maintaining is getting difficult with conventional techniques. Looking into the acute need we are continuously adding different kind of Robots in Home Applications as well as Commercial Sector. Fast ROI, Fool Proof Technology, Customized & Re-Engineered as per Indian Usage and Environment conditions enables users to get optimum utilization of their resources.

Robots are available in the market thru Dealer Network & serviced thru Service Centers spread in India. We are on the path of continual improvement in our Processes, Quality, Cost and Delivery.

Customer Delightness as our Motto. We look forward to see you in the list of our precious clients.

**DUCT INSPECTION****DUCT CLEANING****DUCT COATING**

It is very essential to control the quality of air that we breathe. In most of the centrally air conditioned buildings Airducts are generally dirty due to which air gets contaminated, above all we are unable to see what is the situation inside the ducts. Duct Cleaning in India is highly unorganized sector which is highly labor oriented and not hygienic.

Airbot One is the 1st Robot in India which is capable of inspecting the ducts from inside. After inspecting it can clean as well as coat the ducts from inside which increases air quality and efficiency of the Air-Conditioning system. It is best robot for contractor segment which are involved in this trade. Re-Engineered as per Indian Usage and Environment Conditions.

## AIRBOT ONE

Robot Airduct Cleaner

Cleaning the Building Exterior is always a big challenge for the property owners. On the other hand it is very expensive to get the job done from outside agencies. For contractor segment it also very difficult job because of high risk involved to do the job at heights. Comprehensive maintaining cost gets increased because of very slow job, higher salaries and high insurance premiums. Skypro Building Cleaning /Washing system is designed for cleaning Low/Mid Height Towers and Sky Scrapers. Different kind of equipment available for different applications. Fully automated system does the job much effectively with no risk of life at all.

Fast Pay Back, High Return on Investment, Optimum utilization of the resource makes Skypro and favorite Equipment for FMS companies
